QUANTUM
SENIOR SAFETY AND SECURITY

CORPORATE DASHBOARD

Featuring unified reporting and centralized management, the QUANTUM Corporate Dashboard leverages the cloud to assist with the administration of multiple QUANTUM systems in your corporation.

Accountability for System Maintenance

Accountability for Resident Care

Remote Management

Insights Across Multiple Facilities

CENTRALIZED MANAGEMENT

A quick-view dashboard highlights all of the systems corporate-wide and provides accountability for both resident care and system maintenance.

Staff software logins and door access can be remotely managed, granting corporate staff access to multiple facilities at the same time.

The Corporate Dashboard reports can be used to identify which of your facilities are busiest, which areas and shifts in those facilities require the most resources, and which call types are most frequent.
