QUANTUM™
SENIOR SAFETY AND SECURITY

RESIDENT CARE PLANS

Built on the same groundbreaking technology as QUANTUM™ Insights, QUANTUM™ Resident Care Plans enable facilities to easily measure the care needs of their residents and monitor the activity of the staff providing care.

AUTOMATIC ALERTS

Based on configurable thresholds, QUANTUM™ can automatically alert staff to resident needs and assist with explaining a resident's needs to their family members.

CARE INSIGHTS

Historical care information can be reviewed to discover care trends and assist in proactively determining future care needs. Additionally, care information across the entire facility can be analyzed to ensure quality of care provided and to determine staff performance.

MOBILE CARE LOGGING

With just a few taps, QUANTUM™ Mobile makes it easy for caregivers to capture the care that they provide to residents. Cares can be recorded at any time or associated with nurse call alarms. The list of cares and the categories to which they belong are customizable to meet the needs of any facility.

SPECIFICATIONS
