

DOOR CONTROL SYSTEM

The QUANTUM Door Control System is designed to provide complete door control, with access control and wander management in a single platform. Utilizing an IP Network, the Door Control System allows for management of door functionality from a secure local web browser.

Manage Access for Residents, Family, and Staff

Access Control and Wander Management in a Single Platform

Real Time Status Monitoring

Notify Quickly via Phone, Pager, Text, or Email

CREDENTIAL OPTIONS

Multiple credential types are available to meet your specific needs. Options include traditional card style, key fob, and a thin adhesive disc designed to adhere to existing identification cards.

WANDER TRANSMITTER

The QUANTUM Wander Transmitter features the latest wireless technology, a water-resistant transmitter, and a comfortable band with a locking closure. Without disturbing residents, transmitters can be checked with an easy-to-use QUANTUM Mobile App.
